Note:
1. N is the number of applicable responses.
2. Mean values are calculated after recording the responses 1 (strongly disagree), 2 (disagree), 3 (neither agree nor disagree), 4 (agree) and 5 (strongly disagree) to -100, -50, 0, 50, 100 respectively.
3. Percentage (%) agreement is defined as the percentage of applicable responses that are either 4 (agree) or 5 (strongly agree).
4. Group scale values (unit, school, faculty) are calculated from the aggregated relevant group of student responses.

12.What aspect of this tutor's approach to teaching best helped your learning?

He talked a lot which was goood.

He was a funny guy which made coming to tutorials fun

Serge was both interesting to listen to and talk to. He gave the class the inspiration to learn from the beginning, stating that we should all achieve High Distinctions.

Serge went through what was required of us very thoroughly. He took time to tell us everything from the beginning which was very important to me as I was only ammature with the interaction of computers and especially MAC computers.

Serge's enthusiasm, attitude and knowledge made the tutorials an enjoyable learning experience.

THE WAY THIS TUTOR EXPLAINED EVERY THING WAS VERY CLEAR YET I FEEL A MORE IN DEPTH EXPLINATION COULD HAVE BEEN ACHIEVED.

Very approachable and understandable. Serge made it very easy to understand new topics and would explain them to me if i was unable to comprehend first off.

again enthusiam and engaging everyone, encouragement throughout the course

allowed me to go at my own speed.

he conducted his classes in a way that related to the class. (young class)

personal approach to teaching

thye humour that was used to create a good working atmostphere but still being productive

13.Would you have liked this tutor ro have done anything differently?

I FEEL THAT THIS TUTOR MARKED MY WORK RATHER HARD, I FEEL I DID ALOT OF WORK FOR THIS SUBJECT YET MY MARKS FOR THE WEEKLY SUBMITIONS DIDNT REALLY EXPRESS THIS HARD WORK

More explaining when a question was asked of him, would of helped. And possibly he could speak a little slower, as sometimes i found it hard to keep up with him. Otherwise he was great and some very effective teaching methods.

Nope.

Possibly talked slower... He talks way too fast!!! But he is an excellent tutor.

The only thing I would say here isn't to do with Serge it's another suggestion. I really think that using the normal style of computers would really be a bit easier. I'm not a fan of Macintosh but at the same time thankyou for allowing us to us to use them

Yes, it would be good if he marked the weekly problems within a reasonable timeframe, so that we knew how well we were going with them, and if we had to do more work or not.

got to the point a bit quicker with the tasks we had to complete!!!

maybe a quick reveiw of the previous weekly tasks to let us know where we can improve.

no

not really

the assesments could have more to do with things that may come in handy (designing brochures etc) not things like aboriginal art projects.
also more time could be spent going over howto use programs-on both mac and PC cpmputers
